THE FLAGSHIP – Platinum Packages – All in one

We are proud to being able to offer you these packages. Our Technical Diver and Instructor Internship Programs are unique and got, not only in our opinion, the best value in the diving industry. All courses are conducted in Dahab, Red Sea, the technical diving mecca of the world .Some of the courses included in the Internship are exclusively taught at Team Blue Immersion ,like the TecRec Technical Rescue Course.

The facilities that the courses are conducted is Dahab Divers Technical which is owned and operated by Team Blue Immersion. Dahab Divers Technical is considered the top Technical Diving Facility in the Red Sea.During the internship you become a part of our team and will learn all aspects about technical diving including knowledge and skills for conducting dives safely to 100 meters, build up experience in the role as support and safety diver, learn how to fill tanks with any mix including trimix, maintaining and service equipment, how to run a technical dive shop, how to dive with both sidemount, backmount and much more.

If you pick the Instructor Internship option you also learn how to teach others to do all of the above.As a part of the team you spend hours with us day and night discussing and preparing technical dives. You are going to have more knowledge after these months than the majority of even the most experienced technical divers. You become a part of a group on technical divers and instructors who push the industry further in terms of dive planning, equipment configurations and exploration.You will never look at diving in the same way again.

Your diving ability in terms of buoyancy ,trim, and propulsion no matter how experienced you are is going improve to levels that you did not know existed.If you don't have time to complete the internship in one visit, then you can split it up over 18 months at no extra cost.We had PADI Course Directors and Instructor Trainers from other diving organizations who completely changed the way they dived after taking courses with us. It's an exciting, fun and very rewarding journey your about to start!

Just one small thing before you continue to read. Technical Diving is very addictive. You been warned.

Technical Diving and Instructor Internship Programs 2013

If you already are certified for one of more of the courses included in the packages please contact us and we will see if you are entitled to a discount on the package prices.Equipment rental and air are included in the internship price. Not included is materials ,certifications fees and O2/helium.

IMPORTANT: TO MAINTAIN MAXIMUM QUALITY OF THE PROGRAM, WE ONLY ACCEPT 2 PLATINUM DIVER INTERNS AND 2 PLATINUM INSTRUCTOR INTERNS PER MONTH.

BOOK EARLY TO BE GUARANTEED PLACE IN THE PROGRAM.
